**Experts in Installation of Medical Gas Plants, Central Piping & Mortuaries**

## Save lives. Save time. With Preventative Maintenance service

Medical devices enable healthcare personnel to more accurately monitor patient health, and help doctors perform all sorts of functions from the emergency room to the operating table. If a piece of medical equipment fails, the quality of patient care can decrease, which can affect patient safety. We at Pulse Medics Equipment Ltd recommend preventative maintenance for all types of medical equipment in your facility. Below are just a few reasons why medical equipment repair and maintenance is vital to the overall health of your patients and your business growth.

**FINA Bank House, 2<sup>nd</sup> Floor, Junction of Bamburi & Enterprise Road, Industrial Area**

## Regularly Maintained Medical Equipment is Safer

The bottom line is that medical equipment that is properly maintained is much safer for both patients and medical staff. When medical devices are routinely inspected and maintained, potential issues can be identified and resolved prior to the device malfunctioning or failing to work altogether. At Pulse Medics Ltd, we offer full service preventative maintenance for all types of medical equipment to ensure that your devices are always working properly.

## Work Smarter Not Harder

Performing routine maintenance on your equipment can also allow your facility to operate much more efficiently. By taking a proactive approach to medical equipment repair and maintenance, you can plan for the times when a certain equipment will be out of service. This can allow you to schedule your equipment repair, without having to compromise when it comes to serving the needs of your patients.

## Save Money with Preventative Equipment Maintenance

Finally, preventative maintenance can save you significant amount of money. Complete replacement of a medical device or emergency repairs are often much more expensive than routine maintenance. By ensuring that your medical equipment is operating at peak levels, you'll be sure that each medical device lasts longer. This helps to give you a greater return on your medical equipment investment budget, and helps to keep expenses down over time.

## Interested in Learning About our Preventative Maintenance Offers?
